

pdf-live

'PDF LIVE' is a PDF viewer that extends the open source 'mozilla/pdf.js'. You can start the PDF viewer with toolbar right away with 'PDF LIVE'.

Install

Install with [npm](#):

```
npm i pdf-live
```

Quick Start

CSS

Copy-paste the stylesheet `<link>` into your `<head>` to load our CSS.

```
<link rel="stylesheet" href="node_modules/pdf-live/dist/pdf-live.css">
```

HTML

Copy-paste the icon `<link>` into your `<head>` to load our Favicon.

This step is not required. If you do not wish to set a favicon, skip this step.

```
<link rel="icon" type="image/svg+xml" href="node_modules/pdf-live/dist/favicon.svg">
```

Copy-paste the `<pdf-live>` into your `<body>` to load our PDF live.

```
<pdf-live src="sample.pdf" lang="en" worker="node_modules/pdf-live/dist/pdf.worker.mjs">
```

JS

For ES6

To use PDF Live in ES6, simply import the PDF Live ESM module.

```
<script type="module">
  import './node_modules/pdf-live/dist/pdf-live.esm.js';
</script>
```

For ES5

To use PDF Live in ES5, please load the UMD module of PDF Live with `<script>` tag.

```
<script src="node_modules/pdf-live/dist/pdf-live.js"></script>
```

Usage

The following example references a PDF live element from within the JS code and sets the event.

```
// Find the PDFLive node.
const pdflive = document.querySelector('pdf-live');

// Set event handler for PDF Live.
pdflive
  .on('documentLoaded', () => {
    // PDF document load event.
    console.log('Loaded PDF document');
  })
  .on('pageChange', evnt => {
    // Page change event.
    const pageNum = evnt.detail.pageNum;
    console.log(`Opened page ${pageNum}`);
  });
```
